Magic ice				
Magic Ice is an additive for your pebble water. Only 1/2 teaspoon to 2 gallons of water provides glossier ice surface, faster slide path for the curler, longer lasting pebble and usually results in faster running of the stones. "Magic Ice" removes oxygen from the water, which also results in lower energy costs if you run your refrigeration plant at a warmer setting.

Striking band REPAIRS

Reprofiling is the process of re-exposing the striking band on stones that has worn flat. Continued use of stones with flat striking bands can cause irreparable damage. Our reprofiling is not convex all across the striking band.

Reconditioning is the process of removing granite and polishing back area to leave a narrower total band (1 1/2")

[ZA004]	Reprofile striking band (per sheet)			\$ 960.00
[ZA009]	Recondition striking band (per sheet)			\$ 1,600.00

Tileset/Ailset Curling Stones

A layer is sliced from the bottom of each stone and a disc of Porcelain Tile or Blue Hone granite is epoxy-glued in place. The stone is then reconditioned and guaranteed against pitting and fracturing.

This is recommended for clubs with curling stones that are prone to pitting.

		Per Pair	Per Sheet
